testbanktop** - vector mechanics for engineers: dynamics is designed for a first course in dynamics. new concepts have, therefore, been presented in simple terms and every step has been explained in detail. however, because of the large number of optional sections that have been included, this text can also be used to teach a course that will challenge the more **chapter vector mechanics for engineers: 16 dynamics** - seventh vector mechanics for engineers: dynamics edition 16 - 7 axioms of the mechanics of rigid bodies • the forces act at different points on a rigid body but have the same magnitude, direction, and line of action.  $f = r \times F$  • the forces produce the same moment about any point and are therefore, equipollent external forces. **vector mechanics for engineers: 5 statics** - eighth vector mechanics for engineers: statics edition 5 - 3 introduction • the earth exerts a gravitational force on each of the particles forming a body. these forces can be replaced by a single equivalent force equal to the weight of the body and applied at the center of gravity for the body. • the centroid of an area is analogous to the ... **vector mechanics for engineers: statics - deu** - eighth vector mechanics for engineers: statics edition 7- 3 introduction • preceding chapters dealt with: a) determining external forces acting on a structure and b) determining forces which hold together the various members of a structure. • the current chapter is concerned with determining the internal forces **vector mechanics for engineers: dynamics -
